PRELIMINARY REPORT

To His EXCELLENCY,
JOHN J. CORNWELL,
GOVERNOR OF WEST VIRGINIA.

SIR:—I herewith submit to you my First Annual Report of the Department of Mines, it being the thirty-eighth annual report of the condition of the coal industry of the State. The period covered by the statistics shown therein is for the fiscal year beginning July 1, 1919, and ending June 30, 1920.

This report will show an increase in the production of coal, as well as in the number of employees, and a decrease in the production of coke, with a like decrease in the coke workers, and a decrease in the number of days worked in both branches of the industry. The beginning of the fiscal year found the various operations of the State in a very satisfactory condition both as to demand for their product and as to their ability to secure competent help. This condition prevailed during a greater part of the year, but their inability to secure proper railroad facilities and transportation greatly retarded the production that should have been made. At no time during the year were the railroads able to move the coal that could have been produced, and this, more than any other cause, accounts for the limited increase shown. West Virginia should and could produce at least 125,000,000 tons of coal annually with its present equipment, were the companies provided with a proper supply of railroad cars.

During the year covered by this report there were 882 companies reporting 1,440 operating mines, which, together with the small wagon mines, produce 79,991,316 gross tons of coal, an increase over the coal produced the previous year of 4,115,823 gross tons.

Below you will find a comparison of the production of coal and coke for the fiscal years 1919-20, together with the increase of same:

	1919	1920	Increase Or Decrease	Change In Per Cent
Coal.....	75,875,493	79,991,316	4,115,823 (I)	5.44 (I)
Coke.....	1,956,068	1,172,217	783,851 (D)	40.06 (D)

You will note from the above that the production of coal for the year covered by this report has increased 4,115,823 gross tons over the year 1919, while the production of coke during the same period has decreased 783,851 net tons.

PRODUCTION OF COAL AND COKE

During the year 882 firms representing 1,440 producing mines, together with the small country and wagon mines, reported a total production for the fiscal year ended June 30, 1920, of 79,991,316 gross tons, an increase of 4,115,823 gross tons, or 5.44 per cent. over the year ended June 30, 1919. Within this same period the coke manufactured in the State amounted to 1,172,217 net tons, which is a decrease under the preceding year of 783,851 net tons, or 40.06 per cent. Below you will find the estimated value of the production of both coal and coke for the past year:

The mines of the State average 182 days during the past year as against 204 for the preceding year.

COKE OVENS AND COKE PRODUCED

There were 75 coke plants operated in the State during the year, which reported a total of 10,359 coke ovens, of which number 4,232 were in actual operation, there being 6,127 ovens not in use during the year.

There were 1,872,355 gross tons of coal converted into coke which gave a yield of 1,172,217 net tons of coke and gave employment to 1,205 persons. The decrease in the production of coke as compared with the previous year was 783,851 net tons, at a decreased valuation of \$5,278,702.56. The average price per ton of coke was \$6.36, a decrease of 15 cents per ton under the preceding year.

MEN EMPLOYED

During the year there were employed at the mines and coke ovens within the State an average of 97,426 persons, an increase over the previous year of 5,860. Of the total number employed there were:

14,385.....	Pick Miners
29,425.....	Machine Miners
5,122.....	Machine Runners and Helpers
28,052.....	Inside Laborers
19,237.....	Outside Laborers
1,205.....	Coke Workers

Counting the superintendents, mine foremen, fire bosses, store managers, store and office clerks, it would be safe to add five person per mine, employed in these capacities. Basing this estimate on 1,440 producing mines, it would make a total of 7,200 persons, or a grand total of employees directly connected with the operation of the mines of 104,626.

The nationalities of the persons employed in and around the mines are given in a tabulated form in another part of this report and the totals of the various nationalities are as follows:

American (White).....	56,913
Negroes.....	18,391
Italians.....	6,412
Hungarians.....	4,128

TOTALS.....	97,426

SHIPMENTS OF COAL AND COKE

For the year ended June 30, 1920, the operating coal companies of the State reported 73,404,348 gross tons of coal and 1,172,217 net tons of coke as being shipped over the railroads from the mines in the State. They also reported for the same period 787,606 gross tons of coal as being shipped by river, all of which

originated and was floated down the Great Kanawha. This does not include the tonnage of fuel consumed by water craft and local river trade. There was no coal shipped by the Ohio and Monongahela Rivers and no coke was shipped by water, either by the Kanawha, Monongahela or Ohio Rivers during the year.

SELLING PRICE OF COAL AND WAGES PAID

During the year the average price received by pick miners throughout the State for mining run-of-mine coal was 91 cents as against 80 cents in 1919, this being an increase of 11 cents per ton. The average tonnage produced by each pick miner was 1,595 tons, an increase of 51 tons over the fiscal year 1919. The average annual wage of pick miners (all pick miners included) was \$1,451.45, which was an increase of \$216.25 over that of 1919.

The average selling price of coal shipped from the mines of the State was \$3.40 per gross ton run-of-mine coal, which is an increase of 83 cents per ton over the price received last year. Coke was sold f. o. b. at the ovens during the year at an average price of \$6.36 per net ton, which is a decrease under the previous year of 15 cents per ton.

ACCIDENTS

There were 320 lives lost in connection with the mining industry of the State during the year ended June 30, 1920. Of this number 287 were killed inside the mines and 33 outside, or a total decrease of 58 during that period, 44 of which decrease were inside and 14 outside.

The decrease in the number of fatal accidents is very gratifying, although they are still in excess of the number that should occur. This department is using every effort possible to instill into the minds of the employees the necessity of carefulness and is meeting with some success. During the year Miners' Institutes have been organized in different sections of the State which have been well attended. These institutes are held along educational lines and at each of them speakers have been provided who have brought before the membership the necessity of better working conditions in the mines and the advantages of carefulness while engaged in their hazardous occupation. They are conducted without cost to the State, the members, in most instances, paying a small fee to defray the necessary expenses, and we believe they have aided materially in the reduction of accidents. The employer has also had an important part in the work of these institutes, furnishing the meeting place and, in some instances, paying the entire cost of the meeting. The work along this line is very encouraging and will be continued. Accidents by slate falls and mine cars continue to be the ruling factors in the number of fatalities reported, and are chargeable in a great measure to carelessness and neglect. We still continue to send a monthly report of all fatal accidents occurring at the mines in the State to each company, which is posted in some conspicuous place at each mine where all may read who desire to do so. This report shows the name of company and mine at which each accident occurs, together with the name of deceased, the date and cause of accident and such other information as may be pertinent.

There were 848 non-fatal accidents at the mines during the year, 694 of which were inside the mines and 154 outside, this showing a decrease in non-fatal accidents of 94 under the previous year.

Below is a comparison of fatal and non-fatal accidents during the fiscal year 1919-20.

YEAR	Fatal	Non-Fatal	Fatal Inside	Fatal Outside	Non-Fatal Inside	Non-Fatal Outside

EXPLOSIONS AND ACCIDENTS CAUSING DEATH OF TWO OR MORE PERSONS

During the year covered by this report ten accidents occurred at the mines in this State in which two or more persons lost their lives. This list embraces accidents from all causes, whether from explosions, slate falls or cars.

On July 18, 1919, a local gas explosion at Carswell shaft of the Houston Collieries Company at Kimball, McDowell County, caused the death of M. C. Roberts, mine foreman, Charles Chapman and John Teems, trackmen, John Tolley, cage helper, Albert Smith, canvas man, and Richard Kennedy, brakeman. These men were hanging canvas preparatory to removing a pocket of gas when it became ignited from some un known cause with the above result.

On August 6, 1919, at Weirwood mine of the New River and Pocahontas Consolidated Coal Company, at Pax, Fayette County, seven men were killed by a local gas explosion. They were Charles Buckland, shot firer, Angelo Rugger, brakeman, Leroy Lowry, motorman, and Ben Jones, Willie Jones, Henry Painter and Mike Pittner, miners. This explosion was caused by the burning of a motor cable, which separated causing the ignition of a pocket of gas with the above result.

August 18, 1919, while repairing the track on Main Entry Number 18 mine of the Main Island Creek Coal Company, at Stirrat, Logan County, a fall of roof caused the instant death of Claude Hensley, trackman, and Frank Hammerle, miner.

January 20, 1920, a local explosion caused by the ignition of a small body of gas on the main heading of Yukon-Pocahontas No. 2 mine, operated by the Yukon-Pocahontas Coal Company, at Yukon, McDowell County, instantly killed Mitchell Watson, tracklayer, and Fred Baker, trapper.

February 26, 1920, Hasper R. Stone, mine foreman, L. T. Long, company inspector, and J. F. Blankenship, bratticeman, were killed by a local gas explosion at No. 2 Works of the United States Coal & Coke Company, at Gary, McDowell County. These men went into an old heading which had not been worked for eighteen months without a safety lamp, encountered a small body of gas about 650 feet from face of heading, causing it to explode, and died from suffocation.

February 27, 1920, Julins Petrowski, and Pete Sweetnish, miners, employed at Jamison No. 9 mine of the Jamison Coal & Coke Company, at Farmington, Marion County, were instantly killed by a fall of coal and slate at working place in Room No. 17. These men were instructed by the assistant mine foreman to keep out of place as timbers had been drawn and place was unsafe, but failed to do so, with above result.

May 22, 1920, while engaged in construction work at Mallory No. 3 mine of

the Mallory Coal Company, at Mallory, Logan County, Wm. R. Davis, superintendent, and Lawrence Hager, Will Kennedy, J. W. Hays and Ed Brown, laborers, were caught by a fall of rock and dirt just inside the mine entry, and were instantly killed.

April 9, 1920, John L. Cunningham, machine helper, and A. J. Hite, trackman, at Buchanan mine of the Buchanan Coal Company, at Yukon, McDowell County, were caught by a runaway trip, when cars broke loose from motor, and instantly killed.

June 16, 1920, Rose Pozen and Dominic Olivite, trackmen, at Wendel No. 2 mine of the Maryland Coal Company of West Virginia, at Wendel, Taylor County, were sent by the foreman to clean up and timber a place, and while investigating were caught by a fall of top and instantly killed.

June 17, 1920, Dewey Wilcox, driver, and R. E. Neff, laborer, at Knob Mine of the Knob Coal Company at Morgantown, Monongalia County, were cleaning up rock in haulway when they were caught by a fall of roof and instantly killed.

TONNAGE PER FATALITY

Since the year 1883 the average gross tons of coal produced per each fatality inside the mines have been 161,480 tons, including 1920, which is 278,716 gross tons. At the mines where fatal accidents occurred there was an average of one life lost for each 89,891 gross tons of coal produced. The 287 lives lost inside the mines during the year occurred at 211 mines employing 23,684 persons inside and produced 25,793,082 gross tons of coal, while the other mines at which not a single life was lost inside the mines produced 54,198,284 gross tons. During the fiscal year ended June 30, 1920, the causes of accidents in which lives were lost inside the mines, are summarized as follows:

In conclusion permit me to express my appreciation of the kind and courteous consideration given me in the discharge of my official duties and to thank you for the assistance rendered me in all problems looking to the good and to the upbuilding of the mining industry of the State. Your advice and counsel, when solicited, has been given freely and frankly, and has been a great factor in the present high standing of the West Virginia mine department. I desire also to thank both the operators and employees for the spirit of co-operation shown during my administration and to assure them that their assistance has been appreciated, and to them should be given, in a large measure the credit for the good condition of the mines and which has enabled us to greatly reduce the number of accidents incident to this hazardous occupation.

Respectfully submitted,

R. M. LAMBIE,
Chief of Department of Mines.
